1 Abstract

SOME TEXT - Look at the en in Conclusion for some useful links

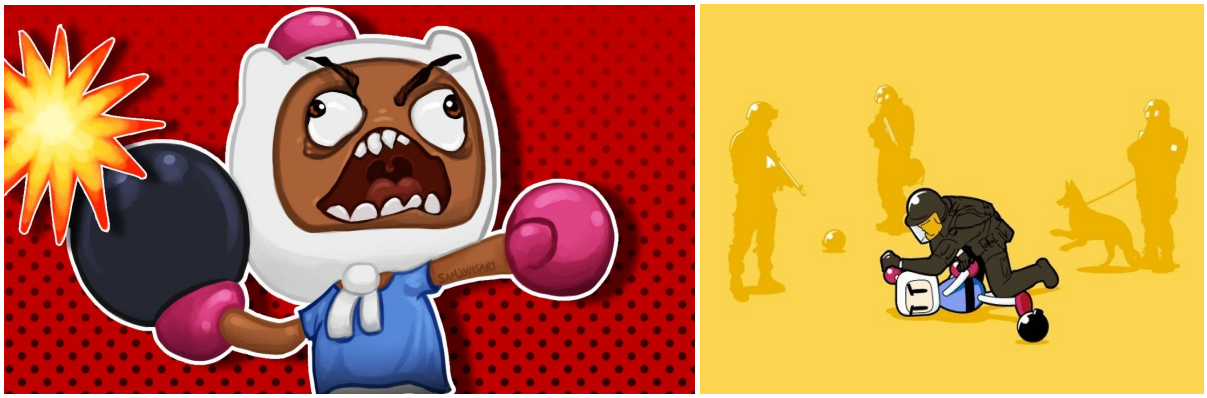

Figure 1: he acts as a dement (left) he is often seen as a terrorist(right)

2 Introduction

[TODO: some text]

3 Explaining the Framework

Features:

- FOR STEP 1:
  - **1.)** Reward the best possible action to a coin, if it is reachable F(s,a)=1 , otherwise F(s,a)=0. 'BOMB' and 'WAIT ' are always 0.
- FOR STEP 1 & 2:
  - **1.)**
    DONE
  - **2.)** Penalize if the action follows the agent to death (F,s)=1, F(s,a)=0. otherwise.
    TO BE DONE: -> FERDINAND

- **3.)** Penalize if the action follows the agent into a "save":(Where the bomb won't at some point explode) position. F(s,a)=1 otherwise F(s,a) = 0. Bombs are always set to 0.
  TO BE DONE: -> DANIEL
- **4.)** Reward the minimal distance that follows to safety if you are in a "Danger zone" (as defined in **3**.) F(s,a)=1 otherwise F(s,a) = 0. If you are not in a "Danger zone" then F(s,a) = 0 for all actions. For Bombs always set F(s,a) = 0.
  TO BE DONE: -> LILY
- **5.)** Penalize failure action F(s,a) = 1, otherwise F(s,a) = 0 . BOMBS are always 0 and WAIT??
  TO BE DEFINED: WAIT ??
- **6.)** Reward when getting a coin F(s,a) = 1, otherwise F(s,a) = 0 .
  DONE
- **7.)** Reward when destroying a block F(s,a) = 1, otherwise F(s,a) = 0 .
  TO BE DONE: DANIEL
- **8.)** Reward (if there are no blocks anymore ? and no coins?) the available movements F(s,a) = 1, otherwise F(s,a) = 0 . Bombs = 0, WAIT =1 ?
  TO BE DEFINE AND -> DANIEL

TD(0) learning

[TODO: some text] Probably not useful, but maybe useful as idea for loading images

some text

some table

Dataset situation				
name	description	precision	recall	mAP
1 - Simple	Paste cards on simple canvases *random rotations, brightness, blurring*	0.974	0.996	**0.991**
2 - Medium	Paste randomly scaled cards on simple canvases *random rotations, brightness, blurring*	0.946	0.988	**0.989**
3 - Elaborate	Paste randomly scaled cards on textures *random rotations, brightness, blurring*	0.937	0.978	**0.971**
4 - Hardest	Paste randomly scaled cards on textures *random rotations, brightness, blurring, less zoom*	0.940	0.983	**0.973**

Table 1: Precision and recall values have been calculated using a IOU threshold of 0.5. mAP values are based on averaged precision values over IOU thresholds of $[0.1, 0.2, \ldots 0.8, 0.9]$

success: classification:
Ad: 0.99995, **Ad:** 0.99997

success: classification
As: 0.99757, **As:** 0.99931

success: classification
Jd: 0.99967, **Jd:** 0.99992
